Online Bachelor of Computer Science

The Auburn University Samuel Ginn College of Engineering invites you to become part of the Auburn Family by enrolling in our online Bachelor of Computer Science (BCS) degree completer program. This online program provides an excellent preparation for professionals looking to become software engineers, enter computing-related fields, pursue graduate study down the road or advance in their careers.

Through hands-on exposure to a variety of computer systems, tools and techniques, the online Bachelor’s in Computer Science program is built on a strong foundation in science, mathematics, social sciences, humanities and computer science. The course work covers theoretical computer science, software construction, operating systems, net-centric computing and more.
